## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 are drawn to a graphical facial image displayed on a mobile terminal, classified in class 455 subclass 414.4.
- II. Claims 4- 22 are drawn to recognizing textual presentation mark up tags, library file tags in a multimedia client terminal, classified in class 709, subclass 219.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as a facial image accompanied by speech displayed on mobile terminal and are selectable by the user whereby subcombination II is related to recognizing textual markup tags received via an Internet protocol from a web server. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification and field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
